

FEATURES & BENEFITS

Our Product

- Utilizes OEM gauge steel structures
- Superior rubber to metal bonding
- High quality bearings with hardened outer plastic covers and polished steel races
- Designed to outperform aftermarket competitors
- The finest technology is incorporated in all newly manufactured applications

Supported by Research & Development

- Ongoing design reviews to match OEM product updates
- Continuous evaluation of current MRC designs
- Constant testing to ensure consistent product performance

Professional Engineering Technology

- MRC manages design & development of all products
- Utilizes the latest 3D modeling software
- Meets the design intent of OEM, fit, form & function
- Manufactured to ISO standards and quality
- Full design & performance testing
