

STEEL BRAIDED CLUTCH LINE

Our Product

ZOOM Performance products are designed for drivers seeking increased performance over OE. These products provide an upgrade to take your vehicle to the next level. All our performance products are designed and tested in-house right here in the USA. Whether you need increased holding power for engine modifications or better clutch pedal engagement characteristics, ZOOM products fit the bill.

Braided stainless steel design increases flexibility to allow easy installation in vehicles with modifications

Teflon inner liner is resistant to degradation by clutch fluid

Stainless steel braided outer layer offers superior corrosion resistance

Each line features OE connectors, and include seals or disconnect tool where applicable to simplify installation
